Camperdown Elm.

This old favorite is the largest of the "umbrella-topped" trees; foliage large, growth spreading and pendent. It produces dense shade and is the best arbor tree for lawns.

American Elm.

This well known tree ranks among the very best for avenue or park, especially in deep or wet soil. It grows rapidly and makes tough branches, rarely being damaged by wind or snow. Its spreading head, drooping branches and stately growth give it the name of the "Monarch of the Forest."

Catalpa—Speciosa.

This medium to large tree with its tropical-like foliage and its pyramids of white flowers is worthy a place in every collection.

Angelica Tree, or Hercules Club.

[Angelica Tree, or Hercules Club.]

A singular looking, small sized tree with very pricky stems, pinnate leaves, and bearing immense panicles of white flowers in midsummer. Very useful to give a tropical effect to gardens and for odd looking clumps for background.

Ailanthus—Tree of Heaven.

From Japan. A lofty, rapid growing tree, with long, elegant, feathery foliage, exempt from disease and insects. One of the most distinct of ornamental trees, with pinnate foliage. Useful to produce tropical effects.

Bechtel's Double Flowering Crab.

A medium sized, hardy ornamental tree of great beauty. When in bloom this tree presents the appearance of being covered with roses. Flowers large, fragrant and beautiful.

Plane.

A favorite avenue tree in Europe, and becoming very popular in this country for the same purpose. So far it has escaped the attacks of insects in our cities. It is a rapid, clean grower, forming a large, spreading tree, attaining a height of 40 to 50 feet, and cannot be too highly recommended where a large growing tree is wanted. Thrives in either high or low ground.

Horse Chestnut.

A very beautiful, well-known tree, forming a round, compact head, with dark green foliage and an abundance of showy flowers early in Spring. Very desirable on account of its hardy, healthy habit. When fully grown, 40 to 50 feet high.
How a home may be beautified. An artistic blending of vines, shrubs and trees.

Let us lay out your grounds

BARNES NURSERIES

(College Hill) Sta. K, CINCINNATI, O.

Office Phone: Park 391 X Residence Phone: Park 1035 Y
Carolina Poplar.

This rapid growing tree, with its large glossy leaves, open head and symmetrical habit of growth, is the best of all poplars for shade and street planting. It retains its foliage later than other varieties and is well adapted to use in smoky cities. They may be allowed to branch to the ground when desired for windbreaks or screens.

Catalpa—Bungei.

A small species that grows 8 to 10 feet high and twice as broad, forming a great bush, clothed with a dense mass of large, heart-shaped leaves. Among our hardy shrubs there are but few, if any, that are more effective as foliage plants for park or lawn. When grafted on a stalk of one of the tree species 5 or 6 feet high, it makes a handsome standard tree, with a very dense and symmetrical globular head without trimming.

Judas Tree, or Red Bud.

A very pretty low-growing, round-headed tree, the stems of which are clothed with a profusion of purplish-red flowers before the foliage appears. Unique and beautiful. They flower at the same time as the Chinese Magnolia, and when planted near together the effect is most striking.

Dogwood.

White and red flowering dogwood are fine small growing trees of spreading, irregular form. Flowers are begonia-shaped, about three inches across, produced before the leaves and just as the Chinese Magnolia flowers are fading, and thus are valuable for maintaining a succession of bloom for the lawn or garden. One of the most valuable lawn trees, and should be planted in pairs, showing the contrasting colors. Autumnal foliage brilliant and beautiful.

Thorn, Double Flowering.

Among the small trees the thorns are classed as leaders, and grow more popular every year. They are dense and low in habit, showy in flower, resembling masses of miniature roses. Hardy and adapted to all soils. Especially valuable for small grounds. Flowers white and scarlet.

Japanese Weeping Cherry.

Among trees of drooping habit there are none more beautiful than these. Its beauty consists not only in its graceful, pendulous habit, but its copious production of beautiful flowers, with which its branches are covered during the blossoming season, producing a most charming spectacle. The foliage, too, is handsome and healthy. It is equally suited to both large and small places, but should be given plenty of room to display its beauty. No other drooping tree of recent introduction is so meritorious. Can be furnished in both white and rose-flowering.

Cut-leaf Weeping Birch.

This fine tree excels all others in its tall form and graceful beauty; its upright center trunk covered with white bark, its drooping branches and pendent leaves increase its attractiveness. It is hardy and thrifty in all locations.

Japan Chestnut.

This variety makes a highly ornamental tree, attaining a height of 30 feet. Nuts about 3 times as large as the American variety and of better quality than the Spanish. Commences to bear when 5 years old and not over 7 feet tall. Hardy.

Helesia, or Silver Bell.

A small tree bearing beautiful bell-shaped pure white flowers similar to the Snowdrop, but much larger. Blooms early. Grown in shrub form it is exquisite.

Koelreuteria.

A small growing round-headed tree from China, with pinnate leaves and large panicles of showy golden yellow flowers in July. An unusually good lawn tree and perfectly hardy.
Japanese Maples.

These slow, low-growing dwarfish trees are general favorites, on account of their dense, compact and graceful growth and brilliant, beautifully cut foliage, varying in color from brightest yellow to deep blood-red. Unsurpassed for lawn decoration. Autumn colorings are gorgeous.

Schwedler’s Maple.

NEW BROAD-LEAVED PURPLE MAPLE.

One of the handsomest, most valuable and popular of the new foliage trees. Its hardiness, easy growth, freedom from insects and disease, and clearly distinct and permanent color, make it especially desirable. In size and form of leaf and habit of growth this tree is very much like the Norway Maple described below. The foliage and leaf stalks, however, are different, being a distinct maroon red or a reddish purple color, quite permanent in mid-summer, and especially distinct in spring and autumn.

Norway Maple.

The dense, dark foliage of this lovely tree and its compact, strong habit of growth, its freedom from attacks of insects, combine to make this the very best street, avenue or lawn tree for all situations. It rivals the oak, and the oldest trees known are still young in appearance.

Silver-Leaved or White Maple.

A hardy, rapid-growing native variety of the largest size; foliage bright green above and silvery underneath. Valuable for producing a quick shade. Excellent for street planting. When fully grown, 50 to 60 feet.

Wier’s Cut-Leaved Silver Maple.

This is one of the most remarkable and beautiful trees with cut foliage. Its growth is rapid, shoots slender and drooping, giving it a habit almost as graceful as the cut-leaved Birch. The foliage is abundant, silvery underneath, and on the young wood especially deep and delicately cut. The leaf stalks are long and tinted with red on the upper surface. It may be easily adapted to small places by an occasional cutting back, which it will bear to any degree necessary.

Magnolia.

A class of valuable and beautiful trees because of their fine foliage, luxuriant appearance and fragrant flowers. They are the best lawn trees in our collection where climate is suitable.

AMERICAN VARIETIES.

Acuminata (Cucumber Tree)—A magnificent native tree with large pointed leaves 6 to 9 inches long; blossoms green and yellow, 4 to 6 inches in diameter; fruit resembles a green cucumber.

Tripetela (Umbrella Tree)—A hardy, native medium sized tree, with enormous long leaves and large white fragrant flowers 4 to 6 inches in diameter, in June.

CHINESE VARIETIES.

These are the dwarf growing, large flowering varieties, of which the best are Speciosa and Soulangiana, white with red-purple centres, and Consipicua, pure white.
Palustris or Pin Oak.
A tall, upright growing variety when young, but with age the branches droop. Foliage bright and glossy. One of the best oaks for street planting and becoming very popular.

Rivers’ Purple Beech.
A variety of European beech with large, smooth, very dark leaves. The best purple lawn tree known.

Cut-Leaved Beech.
An erect, free-growing tree, foliage light green and deeply cut or incised. A fine lawn tree.

Glyptostrobus Sinensis Pendula.
Weeping Chinese Cypress.
Very pendulous, with delicately cut foliage of pea green shade. An elegant tree; distinct and valuable.

Linden.
The American and European Lindens are our best large-leaved shade trees. Specially adapted to lawn planting. Foliage is dense, and when in bloom their fragrance is delightful.
The Lindens are all beautiful, and merit more notice than they receive. They possess many valuable qualities. See cut below.

Black Locust.
A native tree valuable for posts and timber and quite ornamental. The flowers are disposed in long pendulous racemes, white or yellowish, fragrant, and appear in June.

Colorado Blue Spruce.
This photograph is of a specimen about 20 feet high and gives a partial idea of this magnificent tree. This variety of Spruce was found in the Rocky Mountains, and wherever planted has given the greatest satisfaction, thriving well in all conditions of climate, proving entirely hardy, and is universally esteemed as the most beautiful of all evergreens. It will make a very large tree, but the best specimens are grown from quite small trees from the nursery. Florists should keep a stock of transplanted specimens in a conspicuous place.

Laburnum or Golden Chain.
A native of Europe, with smooth shining foliage, attaining the height of 20 feet. The name of Golden Chain alludes to the length of drooping racemes of yellow flowers, which, as Cowper elegantly describes them, are “rich in streaming gold.” They appear in June.

Sweet Gum or Bilsted.
One of the best of our native trees. Its star-shaped leaves, glossy green in summer, take on in fall the most intense shades of purple, orange and crimson. Bark corky and growth stately.
Desirable Trees to Plant.

A LIST OF TREES RECOMMENDED FOR VARIOUS PURPOSES.

For Streets, Roads and Wide Avenues.—American Elm, Sugar, Sycamore and Silver Maples, Carolina Poplar, Pin Oak.

For Driveways through Lawns and Parks.—Norway Maple, Salisburia or Gingko, Tulip Tree, Magnolia Acuminata, Catalpa Speciosa, to which we add American and European Lindens.

Single Specimens of Large Growth.—English and Rivers' Beech, Birches, particularly Cut-Leaf Weeping; English and Purple-Leaf Elms; American, European and White-Leaf Lindens; Norway, Purple Norway, Sycamore and Cut-Leaf Maples; Horse Chestnuts; Austrian and Scotch Pines; Norway and Colorado Spruces.

Single Specimens of Medium Growth.—Imperial Cut-Leaf Alder, Fern-Leaf and Weeping Beech, Catalpa Bungei, Purple Birch, Horse Chestnuts, Laburnum, Chinese Magnolias, Oak-Leaf Mountain Ash, Prunus Pissardi, Flowering Thorns, Hemlocks, White Pines, Siberian Arborvites, etc.

Strong-Growing Trees of Pyramidal Habit.—Lombardy and Bolleana Poplars.

Trees that thrive in Moist Locations.—American Elm, American Linden, Ash, Catalpas, Poplars and Willows.

Trees that thrive on Dry Knolls of Poor Soil.—Silver-leaf and Ash-leaf Maples and Poplars.

Best Trees for Wind Breaks.—Norway Spruce (evergreen), Carolina Poplars and Silver Maples.

Flowering Trees.—Magnolias, white and purple; Judas Trees, Peach, pink and white; Laburnum, yellow; Fringe Tree, white and purple; Lindens, Horse Chestnut, red and white; Cherry, white; Catalpa, Thorns, pink, scarlet, red, white.

Purple and Scarlet-Leaved Trees.—Purple-Leaved Beech, Purple Leaved Birch, Purple-Leaved Elm, Prunus Pissardi, Purple Norway and Sycamore Maples, Japan Maples.

Weeping or Pendulous Trees.—Ash, Beech, Birch (Cut-leaved and Young's), Cherry (Dwarf and Japanese), Crab, Cypress, Dogwood, Elm (Camperdown), Linden (White-leaved), Maple (Wier's), Mountain Ash (European), Mulberry ('Teas'), Willow (Babylonica, Kilmarnock, New American and Wisconsin).
SHRUBS.

BED OF RHODODENDRONS.

It is useless to dwell upon the beauties of this magnificent evergreen shrub. All are familiar with its broad, glossy, dark-green foliage and superb trusses of showy flowers of gorgeous tints and colors.

CULTURE.—They flourish best in peaty soil and, like azaleas, are most effective when grouped. In preparing a bed, if possible, locate it where it will be partly sheltered from the intense heat in summer and from cutting winds in winter. The bed should be prepared with old sod, old manure and sand or, better still, if obtainable, good leaf mould, which prevents the fine hair-like roots from drying out in hot summer weather, from which cause many plants are lost. Heavy mulching in summer is an excellent preventative, and in dry weather the beds should be thoroughly soaked. Pinch off all seed pods after flowering in order to get good buds for next season. In the fall mulch the beds a foot or more with leaves, and if these can be left to decay, it is advisable to do so.

Spireas.

Anthony Waterer.

A new dwarf shrub of great beauty. Its broad flat heads of red flowers continue in perfection many months. Bumalda (pink) and Callosa Alba (white), have the same form and the three make a beautiful combination.

Blue Spirea, or Caryopteris Mastacanthus.

Introduced from China and one of the best fall-blooming, low-growing shrubs, and without doubt one of the greatest acquisitions. Flowers of the most pleasing rich lavender blue. Requires some protection at the north.

Thunbergii.

A Japanese species of small size, with narrow linear leaves and small white flowers; one of the best. Very effective for grouping.

Van Houttei.

The best white Spirea. The annual growth is long and abundant and covered in June with a wealth of pure white blossoms in a perfect cascade of bloom. Perfectly hardy. Should be in every collection.

Hydrangea Paniculata Grandiflora.

This is undoubtedly the best and most effective shrub for all locations, and the tree form of this well known, late blooming shrub, as it attains age, becomes conspicuous and beautiful beyond description.

Exochorda.

Grandiflora.

A rare and beautiful shrub from China. Hardy and easily transplanted; of compact growth, and can be trimmed in dwarf form if desired. Pure white flowers, somewhat resembling the Syringa, but appearing on longer and lighter spikes. Blooms in May about the time of Lilacs and Rhododendrons.

Althea.

Vast improvements have been effected in this variety, and in consequence its old time popularity has been revived. It can now be supplied in a great variety of colors, and also in tree form, which shows off its large brilliant flowers to great advantage, making a very striking object for the lawn.

Deutzia.

A hardy class of plants of fine rather dwarf habit, luxuriant foliage and greatest profusion of attractive flowers, rendering them the most desirable of flowering shrubs. The most popular are Pride of Rochester, producing large double white flowers, the back of the petals being slightly tinted with rose; Gracilis, or Slender Branched, a charming species with pure white flowers and fine for pot culture; Lemoine, the newest and perhaps the finest of the family, the branches being entirely covered with pure white flowers of exquisite form.
Eleagnus Longipes.

Eleagnus Longipes.

A handsome, shapely, silver-leaved shrub, with ornamental reddish-brown bark in winter; perfectly hardy and easy to grow. The bright yellow flowers appear in June on long stalks, but the greatest value of the shrub is in the fruit, which is produced in the greatest abundance along the whole length of the branches; oval in shape and about one-half inch long. Color deep orange red; very showy and attractive. The fruit is not only very ornamental, but has a sprightly, sharp, pleasant flavor, and makes a delicious sauce when cooked. Eleagnus is one of the most valuable ornamental berry-bearing shrubs, and should be largely planted.

Barberry.

Thunbergii.

One of the most effective plants in autumn, after most other deciduous shrubs are bare. Its small oval leaves then assume superb crimson hues, and the slender branches droop beneath their load of bright red berries, which hang on till late in winter. The bush is very thorny and is one of the best plants for low ornamental hedges.

Xanthoceras.

Sorbinolia.

A large growing shrub or small tree from China, foliage similar to Mountain Ash. The flowers are about the size of cherry blossoms and white, with a coppery-colored eye and borne in clusters in great abundance.

Lilac.

These old-time favorites have again sprung into wonderful popularity, and justly so, as wonderful improvements have been made in both form and coloring, and they are now one of our most attractive classes of large growing shrubs.

Japan Tree Lilac.

A new species from Japan. Leaves thick, pointed, leathery and dark; flowers in very large panicles, creamy white and privet-like. Makes a small tree and is desirable because of its distinct foliage and late blooming.

Cornus, or Dogwood.

These are fine, large growing shrubs for planting singly, in groups or for massing, being distinguished for their elegant variegated foliage or their bright colored barks.

Weigela.

These are among the finest of the Japanese flowering shrubs, forming large symmetrical bushes with a drooping tendency, covered in June and July with large trumpet-shaped flowers of varying colors, while some have variegated foliage.

Purple-Leaved Ficbret.

A very conspicuous shrub, with large, dark, purple leaves; distinct and fine. It is to shrubs what Purple Beech is to trees. Color good all the season.

Cut-Leaved Sumach.

A hardy plant of moderate size with large beautiful fern-like leaves, milky white on under side, changing to a brilliant scarlet in autumn.

Japan Snowball.

Handsome piliated leaves; globular heads of pure white neutral flowers, early in June. It surpasses the common variety in several respects. Its habit is better, foliage much handsomer, flowers whiter and more delicate. One of the most valuable flowering shrubs. These can also be supplied in tree form and are very effective.

High Bush Cranberry.

Both ornamental and useful. Berries resemble cranberries, esteemed for sauce, tarts and jams. Berries hang on the bush until late in the fall.
CLIMBING VINES.

Hall's Japan Honeysuckle.
A strong variety, almost evergreen, holding its foliage until late in January. The flowers are pure white and yellow, very fragrant, and cover the vines from July to December. The best of all the honeysuckles.

Wistaria.
Chinensis (Blue Wistaria).—A very strong grower, after once established, that climbs high and twines tightly. It blooms very profusely early in the summer, and again more sparingly later in the season.
There is also a White Flowering variety which is equally beautiful.

Aristolochia Sipho.
Dutchman's Pipe.
A rapid growing climber, with large heart-shaped leaves and curious pipe-shaped yellow and brown flowers. Perfectly hardy and grows 20 feet or more in a season, making a dense shade.

Clematis Paniculata on porch with Ampelopsis Veitchii above.

Clematis Paniculata.
A new vine of rapid growth suitable for covering trellises with glossy green. The small white flowers cover the plant in autumn with a "sheet of bloom."

Clematis Mme. Baron Veillard.
A new variety, much like the popular Jackmanni, except the flowers are a most unique shade of soft pink. A perfect gem.

Ampelopsis Veitchii.
Boston or Japan Ivy.
This variety which came from Japan in 1868 has found great favor throughout this country, and may be seen as a carpet of green on brick and stone walls all through the summer months. It adheres without nailing to brick or stone.

Bignonia, or Trumpet Flower.
A vigorous and hardy climber, with clusters of scarlet trumpet-shaped flowers in August.
A List of the Best Shrubs
With Colors of Flowers.

Weigela—Amabilis, pink.
Candida, white.
Desboisi, dark pink.
Eva Ruthke, brilliant crimson.
Floribunda, dark maroon.
Hortensia nivosa, pure white.
Rosa, rose.
Variegated-leaved, pink.

White Fringe—White.
Xanthoceras Sorbifolia—White.

Climbing Vines.

Aristolochia Siphon—Dutchman’s Pipe.
Ampelopsis—Veitchii.
Virginia Creeper.
Akebia Quinata—Purple.
Tacoma—Radicans (Trumpet Flower), red.
Celastrus—Scandens or Bitter Sweet, red berries.
Cinnamon Vine—White.
Matrimony Vine—Chinese, purple, scarlet berries.

Deciduous Shrubs.

Flowering Shrubs—Variegated or Colored Foliage—
Althea Variegated; Filbert; Barberry, Corchorus, Dogwood, Elder, Golden, Eleagnus Longipes, Prunus Pissardi, Syringa Variegated; Weigela Variegated.

Shrubs that flower in May—Almonds, Forsythia, Honeysuckle, Japan Quince, Lilacs, Exochorda, Prunus Triloba, Snowball, Spirea, Tree Peonia, Wistaria.

In June—Akebia, Clematis, Deutzia, Dogwood, Elder, Eleagnus Longipes, Honeysuckle, Lilacs; Peonias, herbaceous; Rhododendrons, Snowballs, Spireas, Syringa, Weigela, Wistaria.

In July—Clethra, Clematis, Spirea, Honeysuckle.

In August and September—Althea, Bignonia, Clematis, Honeysuckle; Hydrangea Paniculata Grandiflora.

Shrubs whose flowers are succeeded by ornamental fruit—Barberry, scarlet berries in September; Chinese Matrimony Vire, red berries; Dogwood (Red-Branched), white berries in September; Dogwood (Cornelian Cherry), red berries in August; Elder, purple fruit in August; Eleagnus Longipes, deep orange red berries, very showy; Highbush Cranberry; Strawberry Tree, red fruit; Mahonia, blush berries in July.
Showing a block of Paeonias in the Nursery. This effect may be produced by planting in large beds on the lawn or in front of Shrubbery.

PAEONIA

One of the chief points in favor of the pæonia is its hardiness. In the severest climate the plants require no protection. Their vigorous habit, healthy growth, freedom from disease and insects are in favor of their cultivation. When the pæonia is once planted, all that is necessary has been done; they require no further care, and each succeeding year adds to their size and beauty. The foliage is rich and glossy, and of a beautiful deep green color, thus making the plants highly ornamental even when they are not in flower. The pæonia can be planted either singly, on the lawn, or it can be used to excellent advantage to plant as a border line, between lots. A large bed makes a most magnificent appearance. The pæonia is the flower for the many, and a selection of sorts will give continuous bloom from May to July, and in every shade of color from pure white to dark purplish crimson. We have a large and fine line to select from.

Fringe Leaf Pæonia (Pæonia Tenuifolia).—A remarkable and strikingly beautiful variety with delicate fern-like foliage and double scarlet-crimson flowers, very brilliant and satiny. Perfectly hardy.
A rare and valuable species of rose, quite distinct from any of the familiar garden varieties in foliage, flower and fruit. It is a particularly attractive bush, covered with a dense mass of large, glossy, aromatic leaves, which have a peculiar wrinkled appearance. The large, single flowers are very showy, fine rosy-red or white, and are followed by bright scarlet fruit as large as small crab apples.

**Crimson Rambler.**

For a climbing rose the new Crimson Rambler excels all others. Foliage dark green; flowers in large clusters of small semi-double bright crimson, covering the plant for a long season with a "gorgeous sheet of bloom."

This Japanese rose has been tried in all situations and has proved to be one of the best roses ever produced. We cannot recommend it too highly. It can be trained to a trellis or pillar.

**White, Yellow and Pink Ramblers**

are new climbing roses of fine habit and foliage, somewhat similar to Crimson Rambler.

**Marchioness of Londonderry.**

Flowers of great size, perfectly formed and carried on stout stems. Color ivory-white, petals of great substance, shell-shaped and reflexed. Highly perfumed and free flowering. Foliage handsome and healthy.

**Margaret Dickson.**

Of magnificent form; white, with pale flesh center; petals very large, shell-shaped, and of great substance; fragrant, a very beautiful variety; foliage very large, dark green.

**Earl of Dufferin.**

One of the finest roses of recent years; red and velvety crimson, shaded with dark maroon. Large flowers, finely formed, vigorous grower. One of the very finest dark roses.
Pink Baby Rambler.

This magnificent Baby Rambler is equally as meritorious as the Crimson Baby Rambler, which has become so famous. Of dwarf growth, it blooms practically all the time, producing in amazing quantities large clusters or panicles of its beautiful pink flowers, which are full and double; color almost identical with the Dorothy Perkins.

Crimson Baby Rambler.

(Madam Norbert Levavasseur.)

The new ever-blooming Dwarf Crimson Rambler in this new variety we have the wonderful Crimson Rambler reproduced in dwarf or bush form, with this added quality that the Baby Rambler is a ceaseless bloomer. Indoors it may be kept in flower all the year round, and out-of-doors it blooms continuously from June till after late frosts. In addition to the foregoing these may be had in pink and white, known as Pink Baby and White Baby Ramblers. Very desirable for bedding and borders.

Marshall P. Wilder.

The best rose of its color and class, a vigorous grower, flowers large full and well-formed and very fragrant. Color cherry carmine. It blooms as early as any other H. P. and continues through the season.

Paul Neyron.

Flowers of immense size; one of the largest roses grown and one of the finest; color deep shining rose, very fresh and pretty. It is a strong grower and remarkably free bloomer.

Clio.

This is a grand addition to our list of white or blush hardy garden roses. The flower is perfection in form, with fine broad petals; color delicate satiny blush, with a light shading of rosy-pink at the center. It is doubtful if this beautiful rose will ever be outclassed by one of its color.

White Baby Rambler.

This is a Polyantha rose, and is a very interesting variety. Of free growth, producing perfectly double, pure white flowers 1½ inches in diameter, in great profusion. It is delightfully fragrant, having the perfume of hyacinths. It will become a popular variety.

Madam Gabriel Luizet.

A fine satiny rose, inlaid with silvery-rose, heightened at the center. One of the most beautiful roses grown. A strong, sturdy grower.

Mrs. John Laing.

This lovely satiny-pink rose proves to be a most desirable variety. It is large and of fine form and flowers continuously, deliciously fragrant, and valuable for forcing or garden culture.

Teplitz.

A splendid sort; bright clear crimson; very sweet; flower fine form; very showy; a free bloomer.

General Jacqueminot.

This lovely rose is seldom if ever omitted from any collection, and will ever be a favorite. Its clear, rich, brilliant crimson-scarlet color, large and elegant form, free flowering habit and strong erect growth, all combine to captivate the heart of every lover of the beautiful. Perfectly hardy.

Prince Camille de Rohan.

Deep velvety crimson; large; moderately full.
Other Fine Roses.

**HARDY HYBRID PERPETUALS.**

Alfred Colomb, carmine crimson.
Anne de Diesbach, pink.
Baron de Bonstetten, velvety maroon.
Caroline de Sansal, best color.
Coquette des Alps, white and bluish.
Coquette des Blanches, white, often bluish.
John Hopper, rose and carmine.
Jules Margottin, carmine rose.
Leopold Premier, red and crimson.
La France, silvery rose.
La Reine, rose.
Louis Van Houtte, crimson maroon.
Madam Plantier, white.
Persian Yellow, bright yellow.
Pierre Notting, deep crimson and violet.
Rugosa Rubra, deep rose with violet.
Soleil d'Or, golden yellow, shaded with deep red.
Ulrich Brunner, cherry red.
Victor Verdier, bright rose with carmine.
Vick's Caprice, pink, striped white and carmine.

**MOSS.**

Countess de Murinais, white, crested red.
Princess Adelaide, pink.
Salet, red.

**CLIMBING.**

Baltimore Belle, white.
Jules Margottin, carmine.
Queen of Prairie, pink.

**EVERBLOOMING TEAS.**

American Beauty, crimson.
Bon Silene, carmine.
Catherine Mermet, pink.
Clothilde Soupert, pearly white.
Duchess of Albany, deep pink.
Gloire de Dijon, salmon.
Hermosa, rose.
Marechal Neil, yellow.
Meteor, rich dark crimson.
Niphetos, white, tinged yellow.
Perle des Jardins, canary.
Papa Gontier, rose, shaded yellow.
Safrano, saffron and apricot.
Sunset, saffron.
The Bride, pure white.

---

**Best Fruits for the Home Garden.**

We are often asked: "What are the best fruits for my garden?" The following list will answer the question:

**Apples** (Summer)—Early Harvest, Astrachan, Vel. Trans (Fall)—Oldenburg, Gravenstein, Maiden's Blush.
(Winter)—Baldwin, Nonesuch, King, McIntosh Red, Spy, Greening, Sutton Beauty, Spitzenburg, Tolman Sweet, Wealthy, Yellow Bellflower.
**Pears**—Bartlett, Clapp's Favorite, Anjou, Angouleme Kieffer's Hybrid (for canning), Sheldon, Seckel, Lawrence.
**Cherries** (Dark)—Tartarian, Schmidt's, Windsor.
(Light)—Napoleon, Gov. Wood, Spanish.
(Sour)—Olivet, Richmond, Montmorency.
**Plums** (Japan)—Abundance, Burbank.
(Eup.)—Bradshaw, Grand Duke. Lombard, Monarch, Reine Claude, German Prune.
**Peaches** (Ripening in the order named)—Waterloo, Alexander, Hale's Early, Early Crawford, Elberta, Brigidon, Stump, Crosby, Late Crawford, Stevens' Rareripe, Salway.
**Quinces**—Orange, Rea's Mammoth, Champion.
**Apricots**—Early Golden, Moorpark, Montgamet.
**Grapes** (Black)—Moore's Early, Concord, Worden.
(White)—Agawam, Brighton, Delaware, Salem.
(Yellow)—Moore's Diamond, Niagara, Pocklington.
**Currants** (Red)—Cherry, LaVersailles, Fay's. Perfection.
(White)—Grape, White Dutch.
(Black)—Lee's Prolific, Champion.
**Raspberries** (Red)—Columbian, Cuthbert, Marlboro.
(Black)—Cumberland, Gregg, Mam. Cluster, Ohio.
(Yellow)—Golden Queen.
**Blackberries**—Rathbun, Agawam, Erie, Wilson Early.
**Gooseberries**—Industry, Downing, Pearl, Columbus.
**Asparagus**—Colossal, Palmetto.
**Rhubarb**—Myatt's Linneus, Victoria.
# PRICE LIST

In this Price List of Ornamental and Shade Trees, Climbing Vines, Evergreens, Roses, Plants, etc., we have aimed to give approximate prices on the most popular sizes generally called for.

In Shade Trees, the sizes most called for are: 5 to 6 ft., 6 to 8 ft., 8 to 10 ft.
Fl. Shrubs: 2 to 3 ft. and 3 to 4 ft.
Evergreen Trees: 1 to 2 ft., 2 to 3 ft. and 3 to 4 ft.

If special sizes or grades are wanted, call us up or write us about it. We are always ready to make prices on any special size wanted, if we can furnish it.

Always address:

## WEEPING TREES.

Birch, cut leaved                  each $1.00 to $2.00
Elm Camperdown                    $1.00 to $2.00
Mt. Ash                           $1.00 to $2.00
Mulberry, Russian, 1 yr.          $1.00 to $2.00
Mulberry, Russian, 2 yr.          $2.00 to $3.00
Japanese Weeping Cherry           $1.00 to $2.00
Willow Kilmamock                 $0.75 to $1.00

## FLOWERING SHRUBS.

In variety from 25c. to $1.00 each.

Climbing Vines                    each $0.25 to $0.50
Paonies, Herbaceous              $0.35 $0.50 $0.50

## EVERGREEN SHRUBS.

Boxwood                           each $0.20 to $2.00
Mahonia, 1½ to 2 feet             $0.40 to $3.50
Rhodendrons                      $2.00

## ROSES.

Hybrid Perpetual No. 1........... each $0.50 to $4.00
" Medium...                    $0.35 to $3.00
Baby Ramblers                    $0.50 to $4.00
Wichuriana Memorial.............. $0.25 to $2.00
Climbers, No. 1                   $0.50 to $4.00
Climbers, Medium Size............. $0.35 to $3.00

## EVERGREENS.

Colorado Blue Spruce
Kosters................................ $1.50 to $5.00
Other Evergreens, Asst............ $0.50 to $1.50

Hedge Plants.

To screen unsightly objects from view, to mark lines or boundaries, hedges are most useful, and with proper attention very ornamental.

For permanent all-round effect evergreens are desirable, and the best sorts for the purpose are Hemlock Spruce, American Arborvitae in variety, Norway and other Spruces. These can be allowed to row at will or kept in any desired shape by shearing.

Among deciduous shrubs for ornamental hedges the California Privet is very popular, having a foliage of great beauty and permitting a shearing to an extent that would ruin most plants. But in certain situations and for certain uses there is another even better, the Berberis Thunbergi, which for a low hedge has no equal.

This beautiful species from Japan, with round drooping habit, spoon-shaped leaves of fine brilliant green in summer, takes on from early autumn till December the most glowing colors of any shrub or tree—crimson orange, bronze and green, with all the intermediate shades, blended in the foliage of a single bush, the effect being most extraordinary and beautiful. After the leaves fall the branches are seen to be loaded down with scarlet-crimson berries, and these often hang until April, presenting a most beautiful object, and is also of great value to plant as "cover" where quails or other game birds are protected, as they feed greedily on its seeds. For a hedge 3 to 4 feet high it is the very best of all plants, being impenetrable, as it is thickly set with spurs.

No other plant so fully meets every requirement of a hedge, combining beauty in all seasons, hardiness, compact growth, impenetrability and ease with which it may be kept in proper form.

We urge all intending to plant hedges to thoroughly prepare and enrich the soil, if of poor quality. We grow large quantities of these standard plants and will make very reasonable quotations.
